

# ***Addendum for group 106***

## **Group Roles**

- Chair & Timekeeper - Gerard
- Scribe/Recorder - Tomas
- Reader & Sceptic - Ben
- Reviewer/Observer & Energizer - Sean

## **Reflection(labs)**

**Continue** - With our work ethic. We want to continue working hard and meeting deadlines.

**Start** - Warming up the atmosphere, E.g. How we are doing, what we did at the weekend, etc.

**Stop** - Being hesitant. We encourage each other to voice our opinions and not be afraid to participate.

**Satisfied?** - At the end of every lab and meeting we make sure that we are all satisfied that everyone has contributed and participated well.

**Group Think** - Group thinking didn't prove to be a problem for us. Our group rules helped. No one talking over each other or interrupting.

**Changes next time** - Timing in the lab.

## **Alternative example problem solutions**

1. Divide and conquer the problem further, reasoning about what pegs must always connect to each other based on some given conditions.
2. Choose another problem that better illustrates how good solutions look like, e.g.: with some formula/pattern, instead of listing all the solutions' answers by hand.

## **Option weighing and decision making**

- Decide based on two criteria: time left and payoff of a decision.
  - e.g.: When deciding whether to keep our example problem or to change to a different problem we considered how much time we had left until the deadline and how serious the issue was with our current problem.

## **Ground rules**

In the beginning, we had the following ground rules:

- Only one person talking at any given time.
- No shouting.
- Any conflicts will be expressed to the group so a compromise can be reached.

Our ground rules evolved as time passed and we noticed issues with absences, so we included the following rule:

- A member must have a reason for absence.

## **Who-did-what list**

### **Gerard Slowey**

- Screencast production and editing, and slides introducing the problem, review, etc.
- Addendum half.
- Ethical approval form half.
- Storyboard introduction to the example problem/understanding/grid slides, presentation.
- Trello set up, and management. Migration to from an excel to-do list file.
- 4-4 presentation introduction to the topic slide, presentation.
- Brainstorming an example problem.
- Group management - work assignment, putting slides/projects together, decision making, etc.

### **Tomas Baltrunas**

- Addendum half.
- Ethical approval form half.
- Screencast slides exploring solutions/implementation section.
- Storyboard exploring solutions/plan section, presentation.
- 4-4 presentation introduction to plan slide, presentation.
- Brainstorming an example problem.
- Feedback, etc.

### **Sean Colgan**

- Screencast recording/narration and screencast slides on review, etc.
- Storyboard reflection/review slides, presentation.
- 4-4 presentation ground rules slide, presentation.
- Energiser work, etc.

### **Ben McNee**

- Screencast slides.
- Storyboard evaluation/testing slides, presentation.
- 4-4 presentation management slide, presentation. Trello migration.
- Brainstorming an example problem.
- Reader role feedback, etc.
